

TransFER through the Marmaray Tunnel

RCG – the only rail logistics provider for trailer transit

43 kilometres of track on the Asian side of Turkey and 19 kilometres on the European side are connected by the 13 kilometre-long Marmaray Tunnel under the Bosphorus. In addition to public, national and international transport, the 76 kilometre-long line in the Greater Istanbul area also carries freight at night when local transport is not in operation. This enables uninterrupted freight transport between the continents. Rail Cargo Group is currently the only rail logistics operator with a permit for the transit of semi-trailers in addition to 45ft HC containers and swap bodies.*

Your Benefits at a Glance

- RCG obtains the permit for you from the Turkish state railway company TCDD for the transport.
- Uninterrupted transport of your goods through the Marmaray Tunnel, bringing them safely and reliably to their destination.
- Transport cost savings and shortened transport time by bypassing the transshipment of your goods onto trucks and the last mile by road on the Asian side of Istanbul.
- High-quality services due to many years of experience in the industry as well as our passion for maintaining existing projects and developing new ones.
