

# Multimodal Logistics North-South traffic

We transport your goods safely and efficiently from A to B across Europe with our multimodal door-to-door logistics solutions. Connecting major economic regions in Belgium, Germany, Austria, Hungary, Italy, the Netherlands as well as Turkey – a key hub for transport between Europe and Asia – and ensure that your goods reach the most important international freight terminals quickly and reliably, using our own containers and swap bodies. This not only optimises your logistics but also contributes to the shift towards environmentally friendly rail, easing congestion on the Brenner axis and reducing transit traffic in Tyrol.

## Your Cargo. Our Logistics Solutions.

- Plannable door-to-door service for a reliable delivery of your freight – even over long distances.
- Reliable and plannable departures ensure a continuous factory supply – several times a week at defined timetables.
- Sustainable transport solution with our 45ft HCPW containers by rail – with no loss of loading space.
- Assured capacity and universal equipment such as swap bodies with loading and unloading from the sides and top, containers, bulk, trailers, etc.
- Non-stop connections with attractive transit times between Europe's main industrial centres including first and last mile – and transshipment options on request.
- Handling of empty container supply as well as collection and delivery by truck to your end customer – all from a single source.
