

EQUIPMENT

Swapbody 45ft sliding tarpaulins

Thanks to their versatility, swap bodies have become indispensable in intermodal freight transport.

YOUR BENEFITS

- Flexible transport or loading unit
- Loading options from the side and from above
- Quick and easy loading, transport and unloading of goods
- Simple load securing
- Standardised norms and dimensions
- Protection of the goods against bad weather conditions
- Highest transport safety
- Monitoring and tracking of the goods via GPS

WIDE RANGE OF APPLICATIONS

- Palletised goods, big bags, cartons etc.
- Particularly suitable for high-value goods in transit (such as electronic equipment, motors and machines) thanks to special high security locks
- Universally applicable for almost all types of goods, whether liquids or granulates, by using additional packaging aids such as inlays
