

Integrated Management Policy Rail Cargo Operator – Hungaria Kft.

Rail Cargo Operator – Hungaria Ltd. as a member of Rail Cargo Group is part of one of the biggest railway logistics concerns in Europe.

Our company operates in a reliable, safe, cost-effective and environmentally friendly manner, striving for a strategic partnership, with high-quality service based on the principles of sustainable development.

As a railway operator we provide connection between European terminals to transport containers, swap-bodies and semitrailers by rail, in block trains or single traffic. In order to fulfil the requirements of our clients we complete this service with customs forwarding and last mile trucking when requested.

In order to achieve our goals:

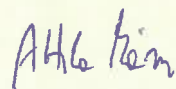

- we perform our activities according to the concerning laws, requirements of authorities, standards and other undertaken commitments.
- our company is operated by committed managers and employees who are trained for consistent interpretation and implementation of company processes.
- we maintain continuous relationships with our employees, customers and all of our stakeholders in order to have them understand our goals, programmes and other factors included in our integrated management policy.
- we continuously improve our processes – in addition to regularly evaluating and managing the risks and opportunities associated with them.
- in selecting suppliers, we prioritize quality, safety and environmental aspects, and we continuously monitor and evaluate their activities.
- we monitor the environmental effects of our activities. In accordance with our social responsibility, we aspire to reduce our environmental impact, to prevent pollution and to achieve our specific environmental goals.
- in order to ensure sustainable development, we pay special attention to the integration of social and ecological criteria.
- we constantly evaluate and manage our risks and opportunities in order to achieve the expected results and prevent unwanted effects.
- we provide high level, regular trainings to our employees (our most valuable assets) in order to enable them to perform their activities at a high professional level. We create working conditions that ensure compliance with requirements of work safety and health, prevent dangers, minimise risks and ensure continuous improvement.

Our company maintains, operates and continuously develops an integrated management system that meets the requirements of ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 standards.
