## Wood

Sophisticated total solutions  
for the wood industry

## Wood – Our Services

From the forests directly to the sawmill or from the timber yard directly to the cellulose and paper industry for further processing.

### Our Services

- Flexible transport solutions in RCG's dense single wagon network in Austria and Hungary
- Seamless connection to the international TransFER connections of RCG
- Individual customer solutions for large volumes using company trains
- Complete solutions for international transports from a single source

## Wood – Your benefits

- TransFER from forest operation directly to sawmill or TransFER from timber store directly to further processing in pulp and paper industry
- Handling of transports according to customer requirements in the single wagon network or as a company train
- Reliable railway logistics provider for the forestry, wood and paper industries
- Largest timber transporter in Central Europe

# Wood – Facts & Figures

## Transport volume

7.3 million tonnes total volume per year, of which:

- 4 million tonnes of roundwood
- 2 million tonnes of processed wood products
- 1.3 million tonnes of wood chips/goods

## Sector-specific equipment

- „Raw timber bull“
- WoodTainer XXL (transport solution for wood chips)

## 45 connecting railways

in Austria directly at the timber customer's site.

# Wood – We are here for you

## Focus markets

- Austria, Hungary, Germany, Italy, Romania, Slovakia, Slovenia und Czech Republic
- Important route networks:
  - TransFER Villach–Italy
  - Company trains Austria–Romania

## Specials

- Establishing fast, safe and high quality block train connections to and from Italy and Southeastern Europe
- Distribution to the end customer

## Paper

Meticulously timed  
production processes

## Paper – Our Services

Paper is patient. Its production processes are meticulously timed. Therefore, a reliable logistics partner is also needed for the supply of raw materials to the paper and pulp industry.

### Our Services

- Receipt of pulp from the major European import ports
- Just-in-time delivery of wood, waste paper, fillers and chemicals
- Distribution to retailers or consumers

## Paper – Your benefits

- Punctual supply of wood, pulp, waste paper, fillers and chemicals from overseas or regionally for the supply of raw materials to the paper and pulp industry
- Securing of transport units (wagons, containers) for the rapid dispatch and onward transport of finished products
- High-frequency and customised TransFER connections to all international ports and the entire Eurasian continent

# Paper – Facts & Figures

## Transport volume

approx. 3.7 million tonnes total volume per year, of which:

- 2.1 million tonnes of graphic paper, packaging and hygiene paper
- 0.9 million tonnes of pulp
- 0.4 million tonnes of waste paper

## Industry-specific equipment

- Modern large-capacity wagons
- MOBILER and ACTS for loose waste paper

## 30 connecting railways

in Austria directly at the paper customer's premises.

# Paper – We are here for you

## Focus Markets

- Austria, Hungary, Germany, Italy, Sweden, Czech Republic
- Significant port transports: Antwerp, Brake, Hamburg, Koper, Monfalcone, Trieste, Vlissingen

## Specials

- On-schedule distribution to printers, retailers or end consumers via our international warehouses (e.g. Vienna Freudenau, San Stino, Desio)

## Building Materials

Tailor-made  
end-to-end logistics solutions

## Building Materials – Our Services

Whether directly from the warehouse to major construction sites, to building material manufacturers or from excavation to landfill – we realise tailor-made end-to-end logistics solutions for the construction industry.

### Our services

- Consulting, planning, handling, implementation
- Holistic logistics and transport services
- Delivery and removal of building materials
- Storage, silo and road logistics

## Building Materials – Your benefits

- TransFER from the warehouse directly to the major construction site or to building material producers or from excavation to landfill
- TransFER of finished products to European economic centres
- Tailor-made customer solutions for complete construction site, warehouse, silo and road logistics
- Implementation of special logistics concepts for the supply and removal of building materials

# Building Materials – Facts & Figures

## Transport volume

approx. 12 million tonnes total volume, of which:

- 4.3 m. tonnes of ballast
- 1.8 m. tonnes of limestone
- 1.2 m. tonnes of salt
- 1.1 m. tonnes of excavated materials

## Sector-specific equipment

- Special containers
- Hb 2-axle and Ha 4-axle covered wagons with/without dividers
- Special wagons (Ua, Za, R, Sg, Fa, Ta)
- MOBILER
- Working locomotives

## 65 connecting railways

in Austria directly at the building materials customer's site.

# Building Materials – We are here for you

## Focus markets

- Austria, Hungary, CIS, Germany, Italy, Poland, SEE, Slovakia, Slovenia, Czech Republic

## Specials

- Development of just-in-time concepts
- Distribution of building materials via our international warehouses (e.g. Desio, Maddaloni, Györszemere)

## Consumer Goods

Reliable, punctual  
and secure logistics solutions

## Consumer Goods – Our Services

Fresh. On time. Environmentally friendly. Whether food, beverages, household appliances or furniture – we deliver directly to our customers' storage locations.

### Our services

- Reliable, timely and safe logistics solutions
- Delivery of raw materials
- Warehouse supply
- Design of distribution solutions to the trade

## Consumer Goods – Your benefits

- Whether it's food, beverages, household appliances or furniture – we deliver directly to the wholesalers or retailers
- Delivery of raw materials, design of distribution solutions, delivery to retailers according to requirements
- Leading international food and beverage manufacturers and retail chains have been relying on our logistics expertise for decades.

# Consumer Goods – Facts & Figures

## Transport volume

approx. 1.3 million tonnes total volume per year (70,000 wagons), of which:

- 630,000 tonnes of beverages/food
- 1.2 million units of white goods

## Industry-specific equipment

- Hb 2-axle and Ha 4-axle covered wagons with/without dividers
- 45 foot containers

## 18 connecting railways

in Austria directly at the consumer goods customer.

# Consumer Goods – We are here for you

## Focus markets

- Hungary, Bulgaria, France, Germany, Greece, Italy, Netherlands, Romania, Slovenia, Sweden, Switzerland, Turkey

## Specials

- Handling of customs clearance
- Wagon loading to various “hubs”, transshipment and truck delivery to central warehouses

## Waste disposal

Expertise in waste management and  
waste transport by rail

## Waste disposal – Our Services

For sustainable, legally compliant and climate-friendly waste handling, we rely on bundled expertise in the fields of **waste management and logistics**.

- Your waste on track – Environmental Solutions
- Expertise in waste management – Environmental Services

# Environmental Solutions – Transporting your waste by rail

- Many types of waste are particularly suitable for **transport by rail**:
  - Excavated material
  - Broken glass
  - Construction and demolition waste
  - Household waste
  - Ash
  - Slag
- **Tailor-made solutions** in rail-based waste transport
- Innovative **end-to-end logistics solutions**
- **Comprehensive infrastructure**
- Single wagon network

## Environmental Services – Competence in waste management

- First **point of contact** for **waste management topics**
- Experts with **know-how** on the **disposal** and **recycling** of waste
- Proper **waste disposal** and **transport for the supply and disposal** of construction sites

## Environmental Solutions & Environmental Services– Your benefits

- **End-to-end solutions** for your **waste transport**
- Complete solutions for **large construction sites**
- **Waste acceptance** and **recycling / disposal**
- Secondary raw material recycling and **construction site transport logistics**
- **Inspection, maintenance** and **cleaning** of oil separator systems
- **Cleaning** of wagons, **function checks, lubrication** and **repair work**

# Waste disposal – We are here for you

## Focus markets

- Environmental Solutions:  
Austria, Germany, Italy, Switzerland, Hungary,  
Sweden, Benelux, France and other countries  
bordering on Austria
- Environmental Services:  
Austria

## Specials

- Wagon cleaning, function checks, lubrication  
repair work
- Inspection, maintenance and cleaning of oil  
separators
