# TransFER Linz–Antwerp

A high-frequency transport system between Austria and Belgium connects Western Europe with Southern and South-Eastern Europe. The supply of surrounding industrial enterprises in the Antwerp–Zeebrugge region is a key feature of the service portfolio as is the connection to the entire European system train network of the Rail Cargo Group.

## Your advantages

- End-to-end logistics solutions including organisation of first and last mile
- Sustainable conventional cargo and container traffic, including dangerous goods transport (RID)
- Freight forwarding services such as transshipment facilities and warehouse logistics
- 6 round trips per week

# TransFER Budapest–Balkans

With this TransFER, Western European economic centres are connected with the countries of Southern and Southeastern Europe. Rail transports from different countries – handled in single wagons and wagon groups – are collected in Budapest-Ferencvaros. These block trains travel regularly to Greece, North-Macedonia, Bulgaria, Serbia and Turkey.

## Your advantages

- End-to-end logistics solutions including organisation of first and last mile
- Sustainable conventional cargo traffic, including dangerous goods transport (RID)
- Freight forwarding services such as transshipment facilities, truck first and last mile, warehouse logistics and customs service

# TransFER Vienna–Záhony

With this high-frequency TransFER from Vienna via Budapest-Ferencváros to the CIS border in Záhony, we form a bridge between normal and broad gauge. By combining different modes of transport, we implement customised logistics solutions – from individual services to customer-specific overall solutions.

## Your advantages

- End-to-end logistics solutions including organisation of first and last mile
- Sustainable conventional cargo and container traffic, including dangerous goods transport (RID)
- Freight forwarding services such as transshipment facilities, warehouse logistics and customs service
- Wide range of terminals and handling services in the Záhony/Chop area
- 5 round trips per week

With our high-frequency TransFER to and from: **S. Stino, Desio, S.Giorgio DI Nogaro, Lugo, Pescara, Maddaloni, Bicocca and Trieste** we offer the full range of safe, reliable and environmentally friendly rail transport services to and from Italy. In conjunction with our local logistics centres, we offer holistic transportation and warehousing logistics, including final distribution throughout Italy, from a single source.

## Your advantages

- End-to-end logistics solutions including organisation of first and last mile
- Sustainable conventional cargo and container traffic, dangerous goods transport (RID) only on request
- Freight forwarding services such as transshipment facilities, warehouse logistics, customs service and final distribution
- Daily departures

# TransFER Sopron–Bucharest

We realise reliable and sustainable transport and logistics services for the Romanian economic area. For this purpose, single wagon shipments from Germany, Austria, Belgium, Italy and Poland are assembled in Sopron into block trains with various goods and transported to Romania.

## Your advantages

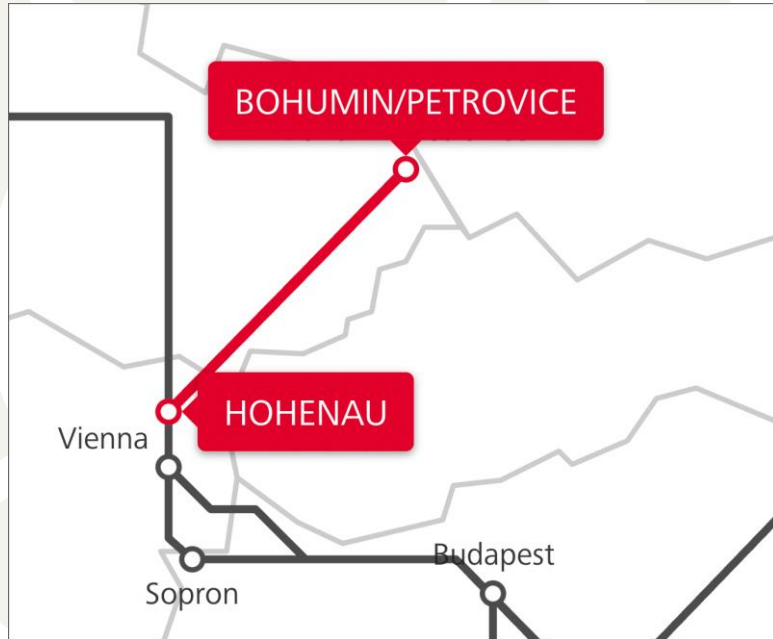

- End-to-end logistics solutions including organisation of first and last mile
- Sustainable conventional cargo and container traffic, including dangerous goods transport (RID)
- Freight forwarding services such as transshipment facilities and warehouse logistics
- By using regular routes, we make short transport times possible

# TransFER Hohenau–Bohumín/Petrovice

This seamless high-frequency TransFER between Hohenau and Bohumín/Petrovice acts as a hub to connect Italy and Austria with Poland. Furthermore we provide the ideal connection to the broad gauge network with our TransFER and with it end-to-end freight train connections to the economic zone of the CIS countries – in an environmentally friendly way.

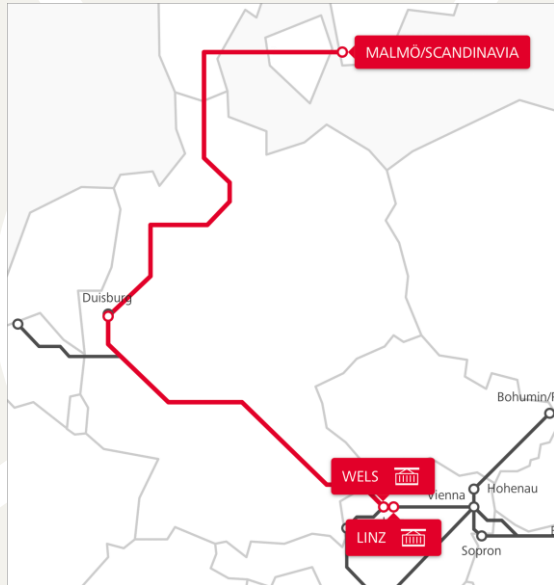

## Your advantages

- End-to-end logistics solutions including organisation of first and last mile
- Sustainable conventional cargo and container traffic, including dangerous goods transport (RID)
- Freight forwarding services such as transshipment facilities, warehouse logistics and customs service
- Multiple daily connections

# TransFER Linz–Scandinavia–Wels

From Linz, it goes by rail to Rheinkamp (near Duisburg). In our well-connected transshipment hub in the Ruhr area, it is possible to add wagons to the train bound for Malmö. From here, further distribution takes place in the single-wagon network for the entire Scandinavian region. Quantities from Scandinavia can also be dispatched in the Ruhr area and distributed in Germany as well as to France, Belgium or the Netherlands, or further transported with our TransFER connection back to Wels for distribution in Austria and South-Eastern Europe.

## Your advantages

- End-to-end logistics solutions including organization of first and last mile
- Sustainable conventional freight transport, including dangerous goods transport (RID)
- Forwarding services such as transshipment facilities, warehouse logistics, customs service
- 3 round trips per week
