

# MULTIMODAL LOGISTICS

## Ruhr Area–North Italy

With this multimodal logistics solution, we not only link important economic regions in Italy and Germany, but also contribute to the modal shift to the environmentally friendly rail along the Brenner axis and to relieving transit congestion in Tyrol. Efficient and reliable transport of containers, swap bodies and craneable trailers between the Ruhr area and North Italy.

### YOUR BENEFITS AT A GLANCE

- Reliable and plannable departures several times a week
- Guaranteed capacity and universally suitable equipment (swap bodies, container, bulk, trailer, ...)
- Direct connection with end-to-end solution – transshipment facilities upon request
- End-to-end transport solution from a single source incl. first and last mile
- Connection to our comprehensive European network (TransNET)

### HERE IS WHAT YOU CAN COUNT ON ...

- ... we can transport **more** loads thanks to our modern equipment: Conventional truckloads hold 24 tonnes – we can handle 27.
- ... the most **sustainable** transport option: Take advantage of this opportunity and save 43.5 kg CO<sub>2</sub>-eq per tonne of freight for the main run from Verona to Wuppertal compared to road.
- ... **efficient** planning of your route.
- ... **innovative** first and last mile concepts.
- ... we bring your goods **safely** to their destination – from the first to the last mile.
