

MULTIMODAL LOGISTICS

Turkey traffic TR–HU/SK–AT–DE/BE

Turkey is an important freight hub for transports between Europe and Asia and connects Western European economic centres with the countries of Southern and South-Eastern Europe. With our multimodal end-to-end logistics solutions, we transport your containers, swap bodies and craneable trailers to and from important international freight terminals in Turkey such as Istanbul (Halkalı) and Köseköy – reliably and efficiently right across Europe.

YOUR BENEFITS AT A GLANCE

- Plannable door-to-door service for you and your cargo
- Non-stop connections with attractive transit times connecting Europe's most important industrial centres with end-to-end solutions including first and last mile – with transshipment options available on request
- Assured capacity and universal equipment (swap bodies with side loading and unloading capability, containers, bulk, trailers, etc.)
- Reliable departures – several times a week with recorded timetables
- Connection to our comprehensive European network (TransNET)

YOU CAN EXPECT US TO ...

- ... make it possible for you to go with us over land all the way to Asia and back, enjoying lower transport costs than air freight and faster transport times than sea freight.
- ... provide you with a cost advantage thanks to our competitive door-to-door prices for long distances.
- ... ensure that you or your customers have a continuous factory supply thanks to our secured train departures.
- ... be able to transport anything you carry by truck by rail with our 45ft swap bodies and 45ft HCPW containers without losing any cargo space.
- ... handle the provision of empty containers as well as collection and delivery by truck to your end customers.
- ... make a significant contribution to protecting our environment and reducing CO₂ emissions with this sustainable transport solution.
