

TRANSFER

Villach–Trieste

Our TRANSFER Villach–Trieste, which extends our TRANSFER Villach–Italy, provides you with a solution for transporting wagonloads to and from the logistics hub at the multipurpose terminal – safe, reliable and eco-friendly. For the first time, we can offer an ideal connection to European and Asian ports from Trieste Servola (Piattaforma Logistica di Trieste) upon request.

YOUR BENEFITS AT A GLANCE

- A transit time of one day between Villach and Trieste
- RCG own traction for the entire TRANSFER
- End-to-end logistics solutions from a single source
- Sustainable conventional freight transport

HERE IS WHAT YOU CAN COUNT ON ...

- ... that our **efficient** transport services bring your wagonloads directly to the terminal at the Port of Trieste using the new railway siding. Here you have direct access to the multipurpose terminal, which consists of the established terminal part for wagonloads at Scalo Legnami with shipping pier (length 360 m, depth 9-12 m) and a newly built area for containers and RoRo units with its own shipping pier (length 414 m, depth 13 m).
- ... that we bring your products **safely** to their destination with this TRANSFER – especially wood, steel, aluminium, and other non-ferrous metals.
- ... that this **sustainable** transport service makes a significant contribution to protecting the environment and avoiding CO₂ emissions.
- ... a **reliable** end-to-end logistics service – including first and last mile.
