

Building Materials

TODAY. TOMORROW. TOGETHER.

**BUILDING
MATERIALS**

You take care of the construction site – we take care of the logistics

From raw materials, such as gravel, to speciality products ranging from salt to finished goods (e.g. concrete elements), your goods are many and varied – and so are our logistics solutions. We understand the requirements of your industry thanks to decades of experience, and can support you with logistics solutions for the delivery and removal of building materials. You can also rely on us for large-scale construction

projects. We plan and manage the entire end-to-end execution of logistics activities and create efficient interfaces between the progress of the construction works and the transport you require. We also keep an eye on warehouse, silo and road logistics and seamlessly combine the various modes of transport so that everything runs smoothly at your construction site.

Your Cargo. Our Logistics Solutions.

- Unloading rail wagons of raw materials, loading/unloading building materials onto/from rail wagons and trucks
- Provision of equipment and load securing advice
- Europe-wide network of specialised warehouses
- Advice regarding the planning, construction and adaptation of railway sidings

Equipment
