

Multimodal Logistics

With our multimodal door-to-door logistics solutions, your goods are transported safely and efficiently from A to B across Europe. Connections between key economic regions in Belgium, the Netherlands, Germany, Austria, the Czech Republic, Hungary, Italy and Turkey ensure reliable supply chains, even over long distances. Turkey also serves as an important gateway for freight movements between Europe and Asia.

Versatile equipment, including containers and swap bodies, enables flexible transport solutions tailored to a wide range of requirements. Your goods are delivered quickly and reliably to major international freight terminals and seaports with direct access to maritime shipping services. This allows you to optimise your logistics operations while shifting more freight transport to rail. In addition, our north-south connections help ease congestion along the Brenner corridor and reduce transit traffic through Tyrol.

Your Cargo. Our Logistics Solutions.

- **Reliable transport planning, even over long distances:** Our door-to-door services ensure the dependable delivery of your goods.
- **Stable supply chains:** Multiple scheduled departures each week, supported by fixed timetables, provide a high level of supply security.
- **More sustainable transport with no loss of cargo space:** Our 45ft HCPW containers enable an efficient shift from road to rail.
- **Flexibility to meet diverse requirements:** Guaranteed capacity and versatile equipment, including swap bodies with side and top loading options, containers, bulk units and trailers, allow transport solutions tailored to your needs.
- **Competitive transit times:** Non-stop connections between Europe's key industrial hubs, combined with first and last mile services and optional transshipment solutions where required.
- **Reduced coordination effort:** We manage empty container supply as well as collection and delivery by truck right through to your end customer, providing a seamless, end-to-end service.
