

Eurasia

TODAY. TOMORROW. TOGETHER.

EURASIA

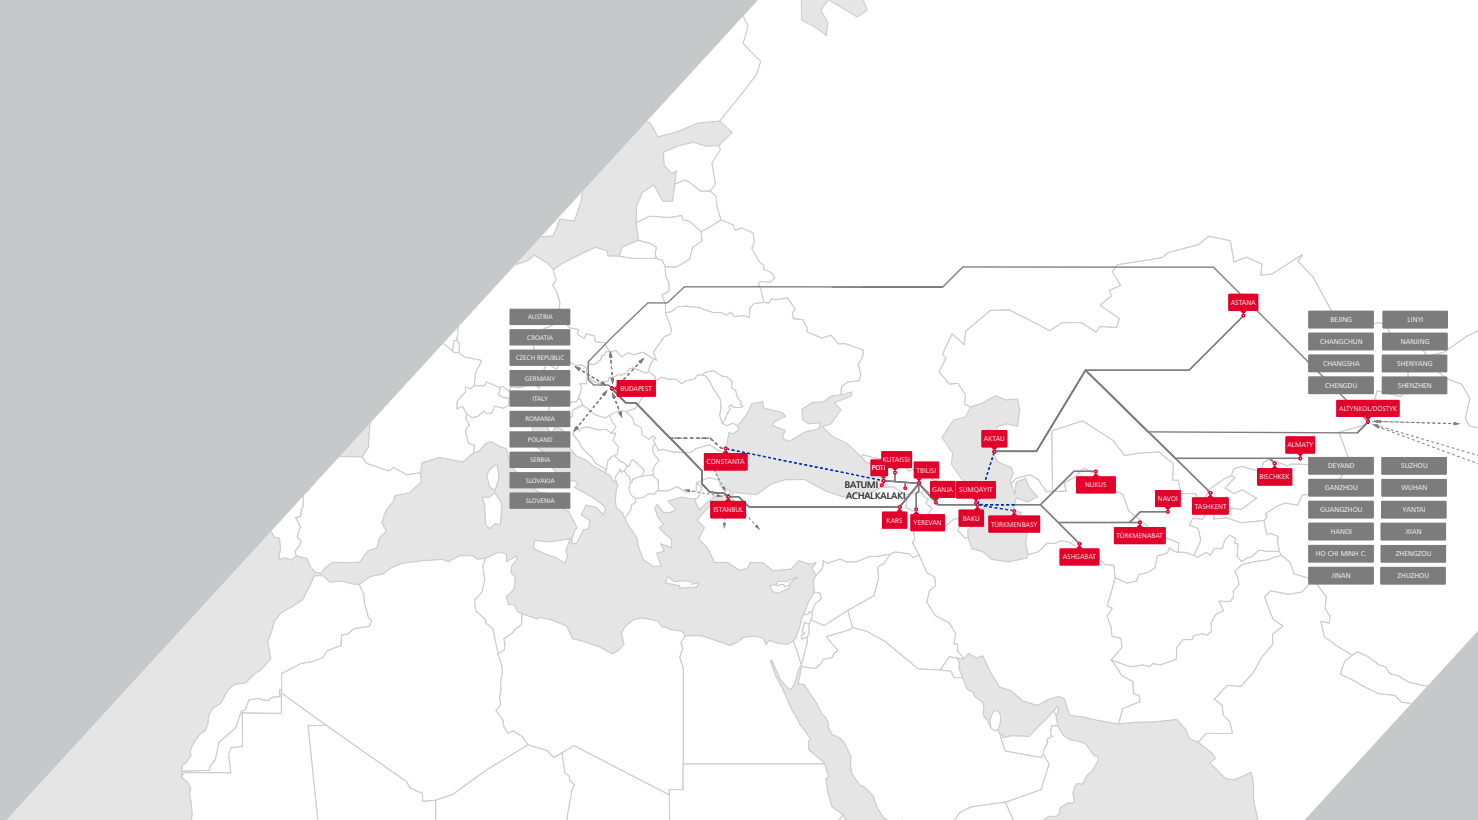

Your transport solution for Europe and China or Central Asia

Goods from or to China are often transported by sea. As an alternative, we offer you intermodal transport solutions by rail via the Middle Corridor or the Northern Corridor through the Altynkol/Dostyk border crossing. The perfect connection for your logistics needs – fast, sustainable and reliable. Whether you are importing from or exporting to the STAN countries

or China: our regularly scheduled trains ensure shorter transit times and provide reliable planning. Your supply chains are optimally connected to European destinations via Budapest, an important transshipment hub of our TransNET. Opt for rail – the transport solution that optimises your supply chain while reducing your CO₂ emissions.

Your Cargo. Our Logistics Solutions.

- Tailor-made end-to-end logistics solutions for efficient container transport between Europe and China or Central Asia (import and export)
- Cost-efficient and environmentally friendly alternatives to air and sea freight
- Shortened transport times and attractive pricing
- Comprehensive logistics handling including all additional freight forwarding services for a smoother process
- One contact person for all areas: Europe, Middle Corridor, North Corridor and China
- Classic operator business, ensuring a reliable and experienced partner relationship
- Sale of individual container slots as a 'door-to-door product' – simple and convenient directly to your doorstep
- Customised block train concepts ('dedicated trains') – perfectly tailored to your specific needs
