

TRANSFER

through the Marmaray Tunnel

RCG – the only rail logistics provider for transit of trailers

43 kilometres of track on the Asian side of Turkey and 19 kilometres on the European side are connected by the 14 kilometre-long Marmaray Tunnel under the Bosphorus. In addition to public, national, and international transport, the 76 kilometre-long connection in the greater Istanbul area also carries freight transport at night when local transport is not in operation. This enables uninterrupted freight transport between the continents. Rail Cargo Group is currently the only rail logistics operator that has a permit for the transit of semi-trailers in addition to 45ft HC containers and swap bodies through the tunnel.

YOUR BENEFITS AT A GLANCE

- Time and transport cost savings.
- RCG obtains the permit from the Turkish state railway company TCDD for the transport for you.
- Our TransFER Bratislava–Köseköy connects Central Europe and Asia through the Marmaray Tunnel.

YOU CAN EXPECT US TO ...

- ... provide uninterrupted transport of your goods through the Marmaray Tunnel and bring them safely and reliably to their destination.
- ... shorten the transport time by bypassing the transshipment of your goods onto trucks and the last mile by road on the Asian side of Istanbul.
- ... guarantee you high-quality services – due to many years of experience in the industry as well as our passion for maintaining existing projects and developing new ones.
- ... make a significant contribution to protecting our environment and saving CO₂ with our sustainable transport solutions.
