

MIKE Ordering Block Train

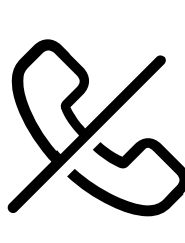

Validate and coordinate block train orders
Bundled communications for block train orders

All parties involved have access to the current order data at all times

Simple modification of order data with full transparency of their effects

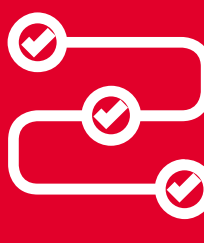

Less loops via email or phone

How does Ordering Block Train work?

This e-Service supports the import of agreed schedules, the transparent processing of orders together with customers and the coordination with implementing partners. Collected information is integrated into the customer's consignment note.

Validate requested orders

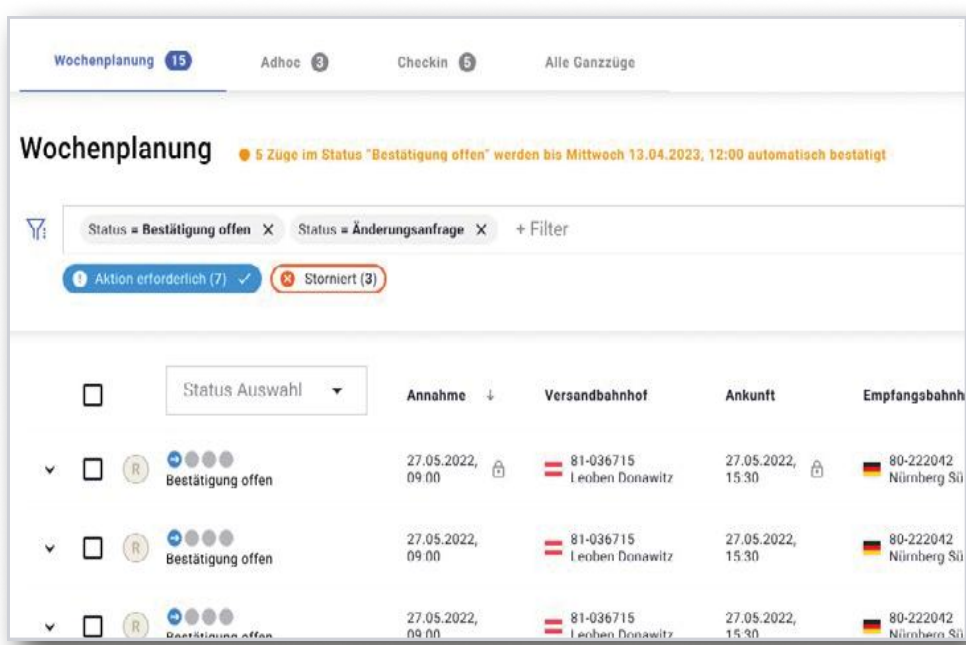

Coordination with undertaking partners

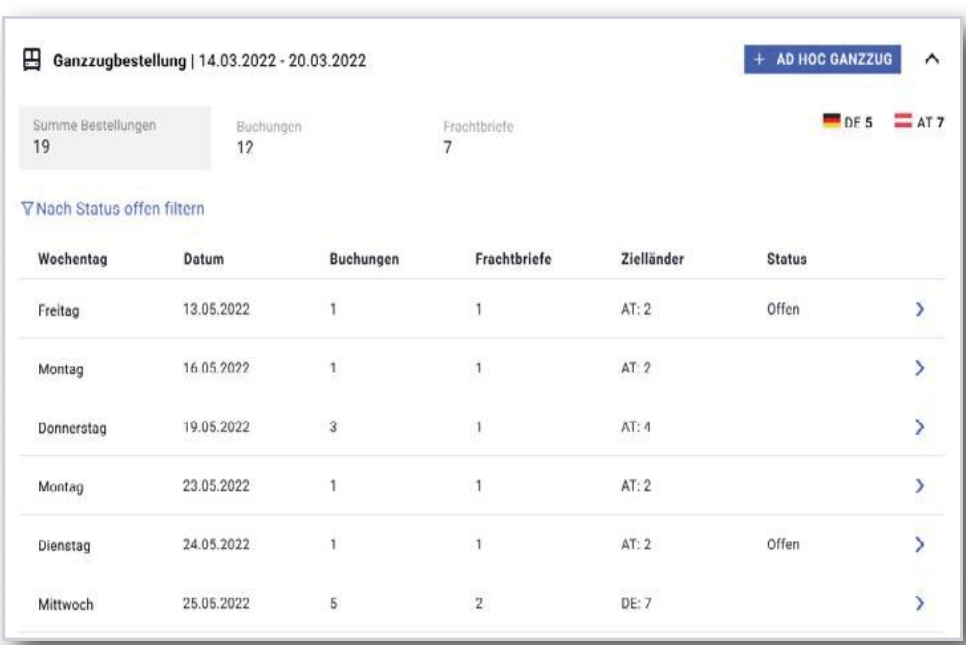

Release orders for consignment note

Core Functions

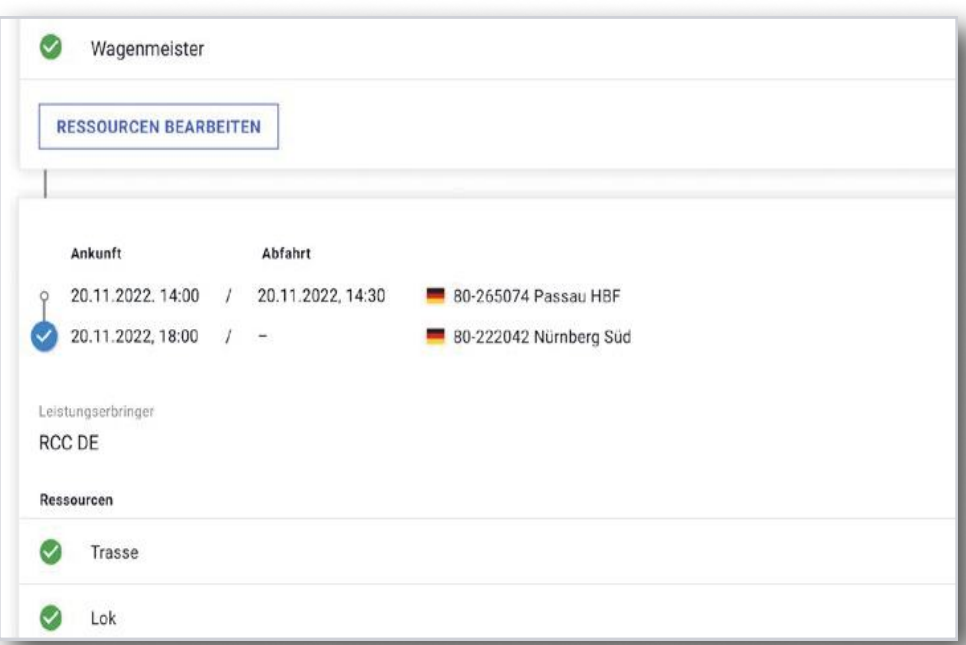

Weekly planning

Confirm or cancel trains from your weekly schedule and keep track of the status of your orders.

Order Ad-Hoc Trains

Order ad-hoc trains using the information stored in MIKE for your contract data.

Processing according to use case block train

Carry out the commercial inspection of block trains and coordinate the services of implementing partners. The availability of partners with access to MIKE is entered directly and is immediately visible.

The path to happy customers
