

TURKEY

Turkey is considered the engine of many European markets and we, Rail Cargo Group, are already on the direct railway route to Istanbul. With **several trains per week**, we play a major role as a European logistics player on the Turkish market. As an internationally active forwarding company, we offer **customised end-to-end logistics solutions** for Turkey's emerging market economy. National and international forwarding services for **conventional and combined rail transport**, short sea shipping, international and domestic truck transport with standard trailers and container trailers all form part of our key services. An all-round service package.

YOUR BENEFITS

- We speak Turkish with you – and manage all communication with operators and partners.
- We take care of every aspect of your logistics needs – end-to-end from the first to the last mile.
- We facilitate transit transports between Europe and the CIS countries/Asia, serving as a reliable bridge for both import and export operations.
- Cost-efficient and environmentally friendly alternatives to road freight as well as accelerated transport times compared to short-sea freight.
- We have the right equipment for your transports, including quality-controlled train systems, high-capacity freight wagons, 45ft containers, and swap bodies.
- We are currently the only rail logistics provider that is allowed to transport your trailers in addition to 45ft HC containers and swap bodies through the Marmaray Tunnel under the Bosphorus.
- When you book your Rolling Road (ROLA) trip from Wels to Maribor with us, we provide pre-booked spots that secure your place, even in case of shortages.

EQUIPMENT

- Conventional freight wagons (wagonloads)
- 20ft, 30ft, 40ft, and 45ft containers
- 45ft curtain side containers
- 25ft and 45ft swap bodies
- Craneable trailer
- Non-craneable trailers (coming soon)
- MOBILER
