

MOBILER – flexible with low emissions

The MOBILER gives you the environmental benefits of rail transport without sacrificing the flexibility of road haulage.

The hydraulic lifting device allows quick and easy handling directly between the truck and the wagon – no need for a crane or a separate siding. The system is versatile and can be tailored to your needs, whether it is for all kinds of waste, palletised goods, liquids, dangerous goods, bulk goods or building materials. Thanks to a Europe-wide transport network, the MOBILER ensures seamless end-to-end logistics, making your transport efficient, reliable and sustainable.

Your Cargo. Our Logistics Solutions.

- **Direct connection:** Reach industrial centres even without a connecting siding.
- **Efficient transshipment:** Fast transfer between truck and wagon.
- **End-to-end deliveries throughout Europe:** Seamless logistics all the way to the destination.
- **Customised equipment solutions:** Tailored to your needs.
- **Extended storage capacity:** MOBILER containers provide a flexible and efficient temporary storage solution, minimising costly truck downtime.
